PROFESSIONAL EXPERIENCE:

Apple, Inc.

December 2020 – Present
Sunnyvale, CA

Senior Front End Developer

- Lead the front-end development of one or more customer facing Retail platforms
- Maintain and improve a growing codebase, and introduce rigor and stability to a growing platform
- Work with designers, engineers, and producers to launch new Apple products and features, from concept to deployment
- Collaborate with system engineers, frontend developers and software developers to define shared platform solutions
- Work with content management and localization teams to support the experience in multiple languages

Traction

February 2019 – December 2020

Lead Front End Developer onsite at the world's largest brand

Sunnyvale, CA

- Create scaffolding tool with Node.js and Webpack that provides project environments to continuously improve work accuracy, efficiency and developers' workflow
- Develop reusable React UI components library with scalable architecture
- Develop front end web applications using React, HTML and SASS (BEM method) to build pixel-perfect UI
- Collaborate closely with other teams on DevOps responsibilities for application deployment, performance, monitoring, reliability and scalability

GroundTruth, Inc.

June 2015 – February 2019

Senior Front End Web Applications Engineer

Mountain View, CA

- Generated \$7 million revenue in the first quarter of release and \$15 million total lifetime revenue by designing and developing the front end of an intuitive, form-based web app that automates the existing business process for partners, enabling partners to create complete proximity and audience targeted campaigns and submit for approval on a per-form contractual basis
- Piloted adoption of SASS, Grunt, Webpack, Karma, and Jasmine throughout various projects
- Developed and maintained front end web applications utilizing HTML5, CSS3, Javascript and AngularJS / Angular 2+ to build pixel-perfect applications and create a seamless customer experience across browsers including mobile

Epsilon Data Management, LLC.

September 2014 – April 2015

Senior Software Developer

Mountain View, CA

- Developed front end of Google internal sites with HTML5, CSS3, Javascript and AngularJS, leveraging the Foundation framework and App Engine for Python backend
- Improved UI/UX to create a seamless customer experience across browsers including mobile
- Consulted and scoped projects for account and project managers as well as clients, condensing and packaging technical language in easier terms for nontechnical audience
- Piloted new technologies, internal tools and programs while working with security team to ensure applications meet security guidelines

Tagged Inc.

November 2013 – September 2014

CRM Developer

San Francisco, CA

- Implemented first-time user experience workflow and subsequent communication using PHP and MySQL, resulting in a 1.5 million increase in Daily Active Users (DAU)
- Developed and deployed mobile app notifications
